

Quality Improvement Coding Guide

Blue Cross Blue Shield of Wyoming is required to track quality in accordance with HEDIS guidelines. We request you submit the following codes to better support our BCBSWY members.

Knowing Providers are invested in the outcome of their patients, we wanted to remind Providers that HbA1c CAT II code information can improve overall patient health. These codes give us the opportunity to improve our HEDIS scores, so we can provide greater context and improve service capabilities.

Please assist us by using the CPT 83036 for a HbA1c laboratory test and by adding the appropriate Category II code on the same claim. CAT II codes are an informational code and should be billed with either a \$0.00 charge or a \$0.01 charge if required by your system or clearing house.

BCBSWY appreciates your assistance and dedication to healthy outcomes. Please use the following codes as applicable:

Category II codes (diagnostic/ screening processes or results)

Category II Codes - Visit Date Must Be Specified

Codes	Code Usage
3044F-HbA1c	Less than 7.0%
3051F-HbA1c	Greater than or equal to 7.0% and less than 8.0%
3052F-HbA1c	Greater than or equal to 8.0% and less than 9.0%
3046F-HbA1c	Greater than 9.0%
