

Blue Cross and Blue Shield of Wyoming

Prime Therapeutics Specialty Pharmacy Drug Management List

Definition of specialty medications: Specialty medications are generally prescribed for people with complex or ongoing medical conditions such as multiple sclerosis, hemophilia, hepatitis C and rheumatoid arthritis. These high cost medications also have one or more of the following characteristics: injected or infused, but some may be taken by mouth; unique storage or shipment requirements; additional education and support required from a health care professional; and usually not stocked at retail pharmacies.
